

COOLING PAD CHECKLIST

- ✱ Reduce the number of on-off cycles.
- ✱ Shade the pads and sump.
- ✱ Dry the pads out completely once every 24 hours.
- ✱ Maintain a suitable water bleed off.
- ✱ Drain and disinfect the entire water distribution system quarterly.
- ✱ Avoid harmful contaminants, including dust, fumes, harsh cleaners, and water treatment chemicals.
- ✱ Run the recommended quantity of water over the pad.
- ✱ Avoid dry areas on the pad.
- ✱ Stop annoying leaks in the water distribution system.
- ✱ Clean the water filters regularly.
